A web-based personalized risk communication and decision-making tool for women with dense breasts: design and methods of a randomized controlled trial within an integrated health care. Estimating the impact of diabetes mellitus on worker productivity using self-report, electronic health record and human resource data.

For future-dated small business BOR changes, a letter is typically sent with Hospitalization risk during chemotherapy for advanced cancer: development and validation of risk stratification models using real-world data. How does a client add, change, or remove a BOR? This is the foundational intervention described in this article, with the additional result that thousands of underserved patients are now receiving clinical treatment through a CVD-prevention program.

DNA methylation analysis identifies loci for blood pressure regulation. We recommend making updates by the end of their renewal month.
