Buy Hardcover. STM probing the supramolecular coordination chemistry on solid surface: Structure, dynamic, and reactivity. If the material has been adapted instead of reproduced from the original RSC publication "Reproduced from" can be substituted with "Adapted from". This allowed us to compare a range of flow-energy adsorption configurations with Data availability The dataset generated during the study is available at an online repository. Furthermore, future perspectives and potential applications are outlined. Any symmetric initial guess structure would likely have failed to reach the deeper energy minimum during structure optimisation. Any symmetric initial guess structure would likely have failed to reach the E.
