In a survey of venture capitalists about investing in the life sciences, 40 percent reported decreasing their life science investments over the past 3 years with an additional 40 percent planning to decrease their investments over the next 3 years NVCA, b. Studies of the genetics of type 2 diabetes similarly provide insights about the relationship between this disorder and cardiovascular disease [50], the role of immune factors [51], and diverse contributors to insulin resistance [52]. Enns concluded by saying that the United States can keep doing what it has been doing or it can keep up with changes in laboratory medicine by modulating regulatory requirements and professional practice standards.

However,despitetheseopportunities,onlyasmallfractionofinvestigati Postmarket surveillance and medical device reporting create much more standardized reporting around the use of these tests, which is important for patients. Gene expression profiling of breast tumors [11] offers a more contested example.
